Factory: Sudair Industrial and Business City

# COMPANY OVERVIEW

Factory: Sudair Industrial and Business City

Office: Riyadh - Jeddah - Dammam - Abha

**RFUFCO** was established in **2007**, and since then, we have proudly provided high-quality storage solutions to over **13,465** clients, reflecting the trust we have earned in the market. We operate across all **GCC countries**, driven by innovation and responsiveness to market needs. Our factory, located in **Sudair Industrial City**, spans an area of **25,000 m<sup>2</sup>**, where we continue to develop our products to the highest quality standards. We also consistently invest in independent research and development projects to enhance core technologies in the storage sector, further strengthening our position as a regional leader in delivering comprehensive and innovative storage solutions.

# DEVELOPMENT SITUATION

## Enterprise goals

To be a trusted and distinguished partner in providing comprehensive solutions for storage systems, logistics services, material handling, and warehouse automation, with a commitment to innovation and excellence in enhancing our clients' operational efficiency.

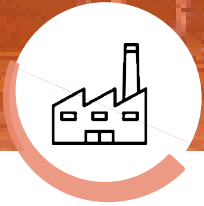

Live Video

# ACHIEVEMENTS

## 2017

We moved from Riyadh to Sudair Industrial City for expansion purposes

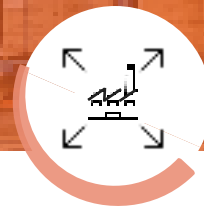

## 2021

Upgrading with the latest equipment available in the market

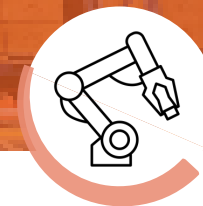

## 2023

The factory has been expanded to reach a total area of 25,000 m<sup>2</sup>

## 2024

All welding processes have been automated using robots

## 2025

SASO - ISO 9001 certification for Quality Management System has been obtained

## Strategic Partner

**13455**  
Partners in Success

**205**  
Utility Models

**45**  
Invention Patents

### Euroroll

A partnership has been established with Euroroll to enhance the quality of dynamic storage technologies.

### Egyroll

Strategic partnership with EGYROLL to enhance automation and logistics capabilities. We collaborate on advanced conveyor solutions.

### Automha

Partnership with Automha to enhance the quality and efficiency of automated and semi-automated storage systems.

### Geyne

A partnership was established with GENYE to enhance the efficiency of sorting systems in logistics services

# R&D GROUP

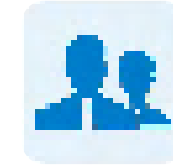

- "Industry + intelligence" as the core concept, focusing on industrial connectivity
- Our products comply with **SASO** standards to ensure quality and safety
- More than **19** years experience - **8643** Completed Projects
- Further recruit of overseas talents to enrich the team

Total Employees **150**

42% With a bachelor's Degree or higher

Technicians **100**

Core team **50**

R&D investment per year  
**11% - 15%**

# AUTOMATION SYSTEM

Four-Way Shuttle Solution ( ASRS)

**Smart Storage.  
Maximum Efficiency.**

A fully automated high-density storage solution designed to maximize space utilization and operational efficiency. The four-way shuttle system enables seamless movement of pallets in all directions, delivering unmatched flexibility, speed and accuracy.

Maximum Efficiency

Multi-directional Pallet Movement

High Storage Density (up to 90%)

Fully Integrated with WMS & WCS

scalable & modular design

24/7 Automated Operation

# SYSTEM PERFORMANCE & FEATURES

**±2 mm**  
positioning accuracy:

**2 m/s**  
acceleration:

**2.5 s**  
reversing time:

**10 Hours**  
continuous operation:

**100+** shuttle scheduling

## system advantages

- high density storage
- high efficiency
- fast deployment
- high flexibility
- optimized cost-performance ratio

## applications:

**5G**  
multi-vehicle collision avoidance (5g communication)

smart task dispatching & path optimization (heat map analysis)

digital twin & real-time monitoring

automatic exception handling

smart charging system

photoelectric +RFID tracking

## scalability:

modular rack and shuttle system that scales easily with growing operational demands

## storage capability:

supports multiple pallet sizes and complex warehouse layouts including irregular spaces, multi-floor and high-bay systems (up to 12m height).

# Years of Experience. Trusted by Clients. Delivered Projects

## Noon

### Mezzanine

Optimized racking system for efficient warehouse flow.

## Laverne

### Automated Conveyor

Installed an integrated conveyor system at Laverne to boost efficiency and workflow

## Dawaa

### VNA Pallet Racking

Innovative racking for enhanced business storage.

## Saudi Electricity Company

### Radio Shuttle

Installed a Radio Shuttle racking system for the Saudi Electricity Company.

## Cenomi

### Multi-tier Mezzanine

The project's scale reflects our expertise in integrated solutions

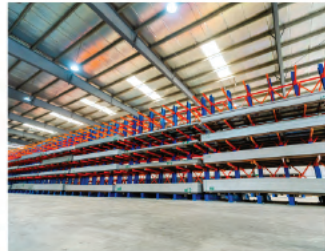

## Watania

### Selective - Radio Shuttle

The project reflects our leadership in integrated solutions.

## Fazah

### Cantilever

A precise project enhancing efficiency and reducing costs.

## Othaim

### Mezzanine- Drive in

The project reflects our leadership in integrated solutions.

# ADVANTAGES OF RACKING

Examples of our projects that showcase the strength and flexibility of racking systems

## ADVANTAGES OF RACKING SYSTEMS

### Optimal Space Utilization

Maximizes vertical storage to fit more without expansion.

### Inventory Organization

Easy access and arrangement of products.

### Improved Efficiency

Reduces time and effort in operations.

## ADDITIONAL BENEFITS

### Enhanced Safety

Organized storage reduces clutter and increases safety.

### Flexible Expansion

Adjustable designs to fit business needs.

### Better Inventory Control

Accurate organization for easier inventory tracking.

# MAIN PRODUCTS

## HIGH-END RACKING SOLUTION SYSTEM

AUTOMATION  
(4 WAY SHUTTLE)

RADIO SHUTTLE

VNA PALLET RACK

SELECTIVE PALLET RACKING

DOUBLE DEEP

DRIVE-IN

AUTOMATED CONVEYOR

PUSH-BACK/FLOW

Mobile pallet Racks
